Vacation Planner Tool Testing Information

- The Software Test Plan for the Vacation Planner Tool is as follows:

Item Tested	Purpose of Test	Test Pass Date
Vacation Class	Ensure all Vacation class member functions operate as intended.	19 May 2026
Excursion Class	Ensure all Excursion class member functions operate as intended.	19 May 2026

- All unit test scripts are screenshotted as follows, and can be located in the Java file:

/vacationplannertool/app/src/test/java/com/example/vacationplannertool/ExampleUnitTest.java:

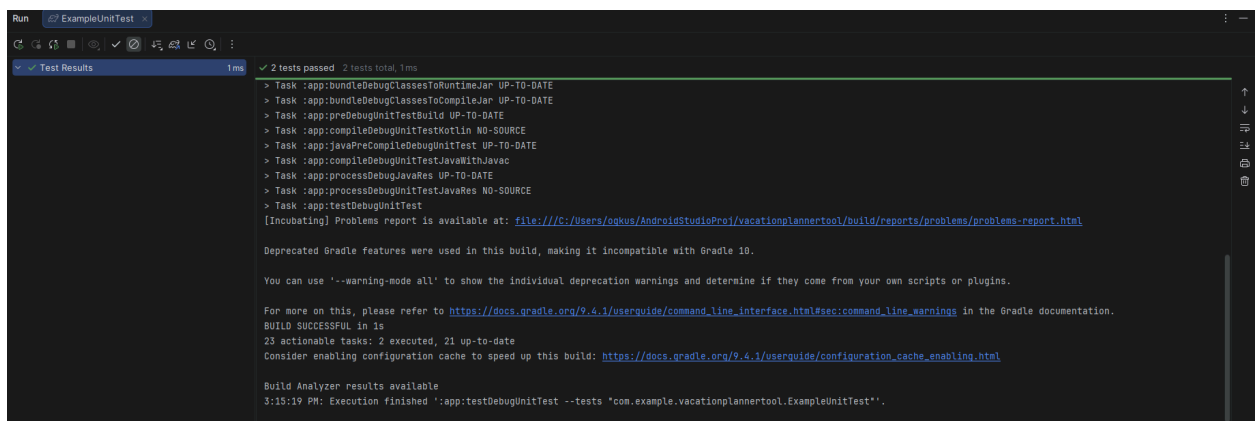

```
@Test
public void validateVacation() {
    Vacation v = new Vacation();
    v.setVacName("Dummy Vacation");
    v.setVacHotel("Dummy Hotel");
    v.setVacStartDate("2026/05/19");
    v.setVacEndDate("2026/05/21");
    assertEquals( expected: "Dummy Vacation", v.getVacName());
    assertEquals( expected: "Dummy Hotel", v.getVacHotel());
    assertEquals( expected: "2026/05/19", v.getVacStartDate());
    assertEquals( expected: "2026/05/21", v.getVacEndDate());
}
```

```

@Test
public void validateExcursion() {
    Excursion e = new Excursion();
    e.setExcName("Dummy Excursion");
    e.setExcDate("2026/05/19");
    assertEquals( expected: "Dummy Excursion", e.getExcName());
    assertEquals( expected: "2026/05/19", e.getExcDate());
}

```

- The results of each Unit Test performed are as follows:

- Fortunately, all unit tests passed successfully upon first attempt, so no changes to the application code were necessary. If any of the tests had not passed, the Vacation and Excursion class getter and setter functions would be examined thoroughly to ensure no syntax errors were made.
